

ENVERGY PROJECTS LTD.

Turnkey Solutions in Environment & Energy

ECO-Friendly Roof Top
"GREEN" Ventilator
We also conduct "ventilation Survey"

ECO- Friendly Roof Top "GREEN" Ventilator

It works by utilizing wind power induced by centrifugal action. The centrifugal force caused by rotating vanes creates low pressure which draws air out through rotating body. Amount of air drawn by ventilator is continuously replaced by fresh air from outside.

ECO- Friendly Roof Top "GREEN" Ventilator designed as per IS No 3103:1975

Advantages

- Runs on Wind power
- No maintenance cost
- Improved Working Conditions
- Comfortable for any type of Roofing & Easy to Install
- Weather & Storm Proof High Temperature Alloy Materials
- Improved Working Conditions
- Hot Air Directly Exhausted

APPLICATIONS

- Chemical, Petrochemical
- Oil Refineries
- Pharmaceuticals
- Fertilizers Industries
- Workshops
- Paper-Pulp Plants
- Soda Ash Plants
- Chloro-Alkali Plants
- Tobacco Companies
- Power Plants
- Cement Factories
- Warehouse / Godowns & Stores

TYPE OF BUILDING

- Factory (Heavy)
- Factory (Light)
- Engine/ Transformer Room
- Boiler Room
- Compressor Room
